

Effective concrete cleaning & etching solution

PRODUCT DESCRIPTION:

Pro-Struct Concrete Etch is a citric acid-based solution designed to clean and etch concrete surfaces effectively. It removes laitance, enhances coating adhesion and prepares bare concrete for coatings. Ideal for garages and residential areas, it ensures a clean, residue-free surface for optimal coating performance.

PRIMARY APPLICATIONS:

- Residential concrete cleaning
- Prepare bare concrete for coating
- Pre-coating surface etching
- Remove laitance from concrete

FEATURES & BENEFITS:

- Easy DIY application
- Improves surface porosity
- Enhances coating adhesion
- Environmentally friendly

DIRECTIONS FOR USE:

Preparation:

Sweep and clean the surface thoroughly. Remove oil spots with a suitable degreaser, such as Pro-Struct Cleaner Degreaser, and rinse thoroughly.

Mixing:

Mix the entire contents of the Pro-Struct Concrete Etch granules with 8 litres of water. Use a watering can to evenly distribute the Pro-Struct Concrete Etch solution.

Application:

Apply evenly whilst scrubbing with a stiff brush or broom, ensuring the floor remains wet until you are ready to rinse thoroughly, then squeegee excess water from the entire floor.

When the floor is dry, rub your hand on the concrete and check for a white film. If a white dust or powder is evident, repeat the rinsing process, being sure to thoroughly scrub during the rinse. Once the concrete is free of surface residue, you are ready to begin application of the coating.

STORAGE:

Store in a dry, well-ventilated area. Keep container tightly closed.

CLEAN-UP AND SAFETY:

Wear protective gloves and eyewear at all times. Be sure to wash your hands thoroughly after use and avoid any contact with your eyes and skin.

TYPICAL PROPERTIES AT 25°C

Composition	Citric acid crystals
Packaging	500 grams
Consistency	Small white granules
Application Method	Stiff brush or broom
Cleaner	Water
Shelf Life	24 Months
